Your NORTH DAKOTA SOURCE
for LOW-BIRTH, HIGH-GROWTH genetics.

*2015 Certified Angus Beef
"Seedstock Commitment To
Excellence" Award Winner!*

TOKACH ANGUS RANCH

WELCOME

Welcome to our 49th Annual Performance sale to be held February 19th, 2024 at Kist Livestock Auction, Mandan ND.

We would like to start off by saying a warm THANK YOU to all our customers and friends that we have made over the past 49 years selling Angus seedstock by public auction. While the reference sires in the sale catalogs have evolved over the years, our commitment to provide highly profitable seedstock to the commercial cattle producers in this region remains steadfast.

The TOKACH BULLS are structurally sound, not overfat bulls that will sire low to moderate birth weights, heavy weaning weights without the benefit of creep feeding or supplemental cow feeding, rapid feedlot gain, plus great carcass traits for those that sell on a grid and enjoy the added Certified Angus Beef premiums.

The TOKACH FEMALE has been our foundation upon which our reputation has been built over the past 49 plus years. The TOKACH FEMALES are hardworking, low input females that have been bred and developed to run in big country with a minimum of care. Cows with bad dispositions, bad feet and udders or being open in the fall all earn a one-way trip to the sale barn.

We have an excellent set of bulls to offer in 2024. The Sitz Resilient sons were highly sought after a year ago and will be favorites again due to their muscle mass and outstanding phenotype. Growth Fund was the #1 bull for registrations in 2023 and it is easy to see why when you look at his sons and daughters. Commodore is back for the third year, and they are long bodied bulls with great dispositions. New this year are the Sterling Pacific sons. They are wide based, heavy muscled and a bit of an outcross for us. We do have smaller groups of Tehama Tahoe and Tehama Patriarch sons that excel on calving ease, moderate frames and carcass quality. If you want a calving ease bull, a high growth bull, a carcass bull or some combination of all three, we have it all in the offering.

As always, we have done our best to present an outstanding set of bred replacement heifers. They are big outlined, broody females that carry the trademark "TOKACH FEMALE" look. Our 2024 offering of bred replacement heifers were synchronized and A. I. bred to either Tehama Tahoe, a widely used calving and maternal bull from the Select Sires stud or Tehama Patriarch from the ABS Bull Stud known for his maternal abilities, calving ease and solid, sound structure.

All the registered cattle have been AngusGS tested to ensure pedigree integrity and provide the most accurate and up to date genetic predications the industry has to offer.

Videos of the sale offering will be posted on DVAuction just like they have in the past for your viewing and buying convenience. Richard & Ben would welcome phone calls on any of the sale offering. They see and feed the sale offering daily and know them better than anyone. They may be a bit biased knowing the genetics behind the sale offering but they will be honest in their opinions. We also would encourage you to stop out at the ranch at any time to see the bulls in person and the environment they were raised in.

The sale cattle have been handled the same as in the past. The cattle have not been creep fed and are currently on home grown feed with a protein and mineral supplement. The bulls were weaned in early October and the bred heifers sorted off on December 1st. Birth weight are taken with a scale, weaning weights taken at weaning and yearling weights taken just in time for this catalog to go to press.

The cattle can be seen at Kist's Livestock Auction in Mandan from February 17th until sale time. Prior to that time, they and the cowherd can be seen at the ranch at your convenience. Thank you to all our customers.

The Tokach Family

Richard and Kathy Tokach

SALE INFORMATION

AUCTIONEER:

Roger Jacobs, Sheppard, Montana406-373-6124

TIME:

The sale will start promptly at 1:00 p.m. CST

SALE LOCATION:

Kist Livestock Auction, Mandan, ND701-663-9573.
Located one mile west of the Memorial Bridge on the east edge of Mandan. For easiest route, take I-94 to Exit 155 to Memorial Highway.

ACCOMMODATIONS:

Sale headquarters will be the Baymont Inn & Suites Mandan, ND, located at Exit 152 on I-94. Ask for the "Tokach Angus Ranch" block of rooms for lowest rates.
800-597-7327 or 701-663-7401

HEALTH:

The bulls have been vaccinated with a seven-way vaccine – B.V.D., I.B.R., PI-3, BRSV, treated for lice, grubs and worms. Females have been bangs vaccinated. Bred females will have received their second dose of Scour Bos 4. Health papers will be furnished to cattle going out of state.

GENOMIC ENHANCED (GE) EPDS:

All the registered cattle in this sale will have GE EPDs. Depending on specific traits, having GE EPDs will provide a similar amount of accuracy as if an unproven animal already had 7-24 progeny. All cattle that have GE EPDs are also parentage verified.

GENETIC DEFECTS:

All registered cattle in this sale have been tested free of the AM, NH and CA genetic defects by pedigree or DNA test.

VIDEO:

If the weather cooperates, we also plan on having video taken on the entire sale offering. While we would prefer you to be on the seats on sale day and seeing the cattle in person, we realize that is not always possible. The videos will also allow you to view the bulls prior to the sale.
Look for the video links on DVAuction.com or on our Facebook page - Tokach Angus Ranch.

WINTERING:

Free wintering on the bulls until April 1st, 2024. All bulls will be semen checked and delivered free at that time. If we are unable to deliver after April 1st then your bulls will have to be picked up at the ranch. The bulls will be handled as if they were our own but are the property of the buyer. Death loss or injury is the purchaser's responsibility. We request that you purchase insurance on any bulls wintered at TOKACH ANGUS RANCH.

RETAINED INTEREST:

Tokach Angus Ranch is retaining one-third revenue sharing semen interest in every bull selling in this sale. Full possession and salvage value sells on all bulls.

PREGNANCY INFORMATION:

The females have been pregnancy checked by a competent veterinarian and guaranteed to be safe in calf. The A.I. breeding dates listed in this catalog through ultrasound examination are determined by a skilled technician. They are not unconditionally guaranteed as to breeding dates.

BIDS:

Buyers unable to attend the sale may call or send their bids to the owners, auctioneer or representatives. Satisfaction guaranteed.

TERMS:

All animals will sell fully guaranteed according to the terms and conditions of the American Angus Association.

FIRST SEASON BREEDING GUARANTEE:

All bulls selling for \$3,000 or more will be covered 50% by Tokach Angus Ranch if they have an untreatable injury that would keep the bull from being a breeder for the first breeding season. Breeding season is defined as the 90-day period following the first turnout of the bulls. If a problem occurs, 50% of the value of the injured bull, minus any salvage value, will go toward a replacement bull if one is available or will be given as credit in a future sale. Injury resulting in death of the bull will not be the responsibility of Tokach Angus Ranch. This is an insurable risk that the purchaser can obtain coverage for through various livestock insurers. All injured bulls must be diagnosed by a veterinarian. Please notify us as soon as possible should an injury occur and prior to the injured bull being sold for salvage. All claims must be made prior to September 1, 2024.

SALE DAY PHONE:

701-663-9573, Toll Free 1-800-732-1163. In case of severe storm sale day, phone 663-9573 or turn your radio to 550 KFYR, Bismarck.

DELIVERY:

FREE DELIVERY to central stockyards in North Dakota and surrounding states on all registered lots. Commercial Females at cost. Deliveries will start immediately after the sale on the registered bred females.

EXPECTED PROGENY DIFFERENCES:

The EPDs published in this sale catalog are current as this catalog was being put together. With weekly updates from the American Angus Association the EPDs will change slightly by sale day.

Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).

GE-EPDs have become the industry standard for herd improvement, building on decades of science-backed genetic evaluation tools originated and maintained through the American Angus Association, home to the largest and ever-growing single-breed beef cattle database.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they have recorded an average of 15 progeny, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation.

TRAIT	PROGENY EQUIVALENT	TRAIT	PROGENY EQUIVALENT
Calving Ease Direct	25	Pulmonary Arterial Pressure	17
Calving Ease Maternal	19	Hair Shed Score	8
Birth Weight	23	Heifer Pregnancy	17
Weaning Weight	27	Maternal Milk	35
Yearling Weight	22	Mature Weight	14
Yearling Height	15	Mature Height	9
Dry Matter Intake	11	Carcass Weight	14
Scrotal Circumference	13	Marbling Score	10
Docility	11	Ribeye Area	16
Foot Claw Set	13	Backfat Thickness	13
Foot Angle	13		

How do you know if EPDs are genomic-enhanced?

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS™ powered by partner Neogen or the HD50k by partner Zoetis. These images indicate animals for which genomic testing has been conducted and incorporated by AGI into GE-EPDs

AMERICAN ANGUS ASSOCIATION SELECTION TOOLS

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus.

Accuracy (ACC), is the reliability that can be placed on the EPD. An accuracy of close to 1.0 indicates higher reliability. Accuracy is impacted whether the animal has a genotype and the number of progeny and ancestral records included in the analysis.

Calving Ease Direct (CED), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

Birth Weight (BW), expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

Weaning Weight (WW), expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

Residual Average Daily Gain (RADG), feed efficiency expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

Yearling Weight (YW), expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

Yearling Height (YH), is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to the that of other sires.

Scrotal Circumference (SC), expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

MATERNAL

Heifer Pregnancy (HP), is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is more favorable.

Calving Ease Maternal (CEM), is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

Maternal Milk (Milk), is a predictor of a sire's genetic merit for milk and mothering ability in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

Mature Weight (MW), expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

Mature Height (MH), expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

MANAGEMENT

Dockity (DOC), is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable dockity in a sire's offspring compared to another sire.

Claw Set (Claw), is expressed in units of claw-set score, a lower EPD is more favorable, indicating a sire will produce progeny with more symmetrical, even and appropriately spaced toes.

Foot Angle (Angle), is expressed in units of foot-angle score, a lower EPD is more favorable, indicating a sire will produce progeny with an angle closer to 45 degrees at the pastern and appropriate toe length and heel depth.

Pulmonary arterial pressure EPD (PAP), is expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score to decrease the risk of progeny contracting high altitude disease most commonly experienced at 5,500 ft or greater in elevation.

CARCASS

Carcass Weight (CW), expressed in pounds, is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

Marbling (Marb), is expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

Ribeye Area (RE), expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

Fat Thickness (Fat), expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\$VALUE INDEXES

\$Value Indexes, reported in dollars per head, are multi-trait economic selection indexes where a higher values suggest more profit when comparing two individuals.

Maternal Weaned Calf Value (\$M), expressed in dollars per head, predicts profitability differences in progeny from conception to weaning by decreasing mature cow size and improving dockity, foot structure and fertility while maintaining weaning weights consistent with current production.

Weaned Calf Value (\$W), expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning.

Cow Energy Value (\$EN), is expressed in dollar savings per cow each year due to lower cow maintenance energy requirements (due to lactation and body size) with a larger number being more favorable.

Feedlot Value (\$F), expressed in dollars per head, is the expected average difference in future progeny performance for postweaning feedlot merit (growth and feed efficiency) compared to progeny of other sires assuming producers retain ownership of cattle and sell on a carcass weight basis.

Grid Value (\$G), expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), expressed in dollars per carcass, represents the expected average differences in the progeny postweaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot and sell on a carcass merit grid.

Combined Value (\$C), an index, expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd. The remaining cull heifer and steer progeny are then assumed to be sent to the feedlot where the producers retain ownership of those cattle and sell them on a quality-based carcass merit grid.

American Angus Association \$Value Indexes

Maternal Weaned Calf Value (\$M), an index expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning. \$M is built off of a self-replacing herd model where commercial cattlemen replace 25% of their breeding females in the first generation and 20% in subsequent generations. Remaining cull females and all male progeny are sold as feeder calves. Increased selection pressure on \$M aims to decrease overall mature cow size and improve foot structure and fertility while maintaining weaning weights consistent with today's production.

Weaned Calf Value (\$W), an index expressed in dollars per head, provides the expected difference in future progeny preweaning performance from birth to weaning. \$W assumes that producers retain 20% of their female progeny for replacements and sell the rest of their cull female and male progeny as feeder calves. Over time, increased selection pressure on \$W will increase pre-weaning growth through additional weaning weight and maternal milk with expenses adjustment for mature size and maternal milk.

Cow Energy Value (\$EN), an index expressed in dollars per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in future daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing \$EN savings differences include lactation energy requirements and energy costs associated with differences in mature cow size.

Feedlot Value (\$F), an index expressed in dollars per head, is the expected average difference in future progeny performance for postweaning merit compared to progeny of other sires. The underlying objective assumes commercial producers will retain ownership of cattle through the feedlot phase and sell fed cattle on a carcass weight basis with no considerations of premiums or discounts for quality and yield grade.

Grid Value (\$G), an index expressed in dollars per carcass, is the expected average difference in future progeny performance for carcass grid merit, including quality and yield grade attributes, compared to progeny of other sires.

Beef Value (\$B), an index expressed in dollars per carcass, facilitates simultaneous multi-trait genetic selection for feedlot and carcass merit. \$B represents the expected average differences in the progeny post-weaning performance and carcass value compared to progeny of other sires. This index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a quality-based carcass grid.

Dollar value indexes, or \$Values, are a tool used to select for several traits at once based on a specific breeding objective. An economic index approach takes into account genetic and economic values as well as the relationships between traits to select for profit.

MAKE YOUR CATTLE STAND OUT

You've made a significant investment in your genetics, but does the market recognize that? Stand out by differentiating our cattle with AngusLinkSM programs: the Genetic Merit ScorecardSM and AngusVerifiedSM.

ANGUSLINK
**GENETIC
MERIT
SCORECARDSM**

The Genetic Merit Scorecard gives buyers the confidence they need to pay more for your quality calves.

**ANGUS
VERIFIEDSM**

AngusVerified validates your calves are sired by registered Angus bulls and make your cattle stand apart from other black hides on sale day.

Users of AngusLink programs earn **\$13-15/CWT PREMIUMS** on average. Give us a call, and learn how to claim your competitive edge with AngusLink value-added programs.

THANK YOU!

COMMERCIAL BRED HEIFERS

Selling 30 Commercial Bred Heifers

Each year, one of the highlights of the spring sale season has been the selling of our elite commercial bred heifers. Just like in years past, we have sorted out this special group of females shortly after weaning and then culled, sorted and culled again before they were synchronized, and AI bred to one of the most highly rated cow makers in the Angus breed. You can literally feel the excitement fill the air as these high volume, deep ribbed, large outlined, feminine fronted females fill the ring at Kist Livestock Auction. For the past 33 years, the region's top cattlemen have gathered to experience the auctioneer's chant firsthand and take part in the fast and furious bidding that takes place to see who gets to take the prize of the spring sale season home with them. New and repeat buyers alike have told us the heifers have exceeded their every expectation for quality, disposition, milking ability, breed back and the quality of the offspring they have produced. You can purchase bred commercial heifers from a lot of places, but you simply will not find any that are more tightly related, higher quality or having the genetic potential that these heifers and their offspring possess. As one top notch cattlemen once told us, "Where else are you going to find heifers like the TOKACH females."

As an added bonus, this year's heifers were synchronized, and AI bred on June 5th to TEHAMA PATRIARCH. PATRIARCH is a true calving ease bull with outstanding maternal, foot structure and carcass traits. His pedigree stacks several of the breed's most notable maternal sires. PATRIARCH has been one of the top semen sellers at the ABS Bull Stud for the past three years.

TOKACH PLUS ONE 2519 (Reg# 20507524) served the clean-up bull on the commercial heifers. 2519 is a calving ease bull with a 109 weaning ratio and Weaning and Yearling EPDs in the top 15% of the breed. Plus, he is extra strong on carcass traits with both Marbling and Ribeye EPDs over 1. All the heifers will have received their second dose of Scour Bos 4, rechecked for pregnancy and health papers completed to allow them to go anywhere.

Remember all these females were raised right here on our ranch and our brand. If you are in search of a special group of closely related foundation females AI bred to the exciting TEHAMA PATRIARCH, please be on the seats on sale day February 19th.

You will not be disappointed!

B

TEHAMA PATRIARCH F028

BD: 2/3/17 Reg. #: *18981191

- PATRIARCH features a bullet proof maternal pedigree with the power, data and phenotype to produce outstanding females and powerful bulls.
- PATRIARCH is one of the top sales leaders the past three years for the ABS Bull Stud.
- PATRIARCH is a sure-fire calving ease bull that excels on feet and leg structure and is backed by two of the breed's greatest maternal sires.

PUREBRED BRED HEIFERS

As you page through our 2024 sale catalog, you will note that we have once again put together an outstanding group of registered bred heifers for our annual sale. Like in previous years, we have tried to select a wide variety of females representing every major sire group from our 2022 calf crop. Most of these females were selected right out of the middle of our AHIR data to give you a true cross section of our genetic program. The balance of these heifers were placed in this sale as true sale attractions as they represent some outliers in terms of performance, carcass values and phenotype. These heifers and their progeny represent the most current and highly sought-after genetics that the Angus breed has to offer. They are the type of genetics to build a cowherd around and the very same genetics that we are building our future around.

The heifers have been synchronized and AI bred to either the high maternal, multi-trait leader, Tehama Tahoe from the Select Sires stud or Tehama Patriarch, featured in the ABS stud as their sales leader for maternal valves and feet & leg structure. Both bulls have sired numerous sale toppers across the country. The heifers will have received their second shot of Scour Bos 4 by sale time, rechecked for pregnancy and health papers will be provided to allow them to go anywhere.

Join the growing ranks of Angus breeders who have put the power of the TOKACH FEMALE to work for them!

You will be glad you did!

- Low birth weight and high growth numbers in the feminine fronted, deep sided heifer.
- Top 20% of the breed for \$W – Weaned Calf Value and top 25% for Weaning and Yearling EPDs.
- Due MARCH 14th to TEHAMA PATRIARCH.

DEDICATED. COMMITTED.

WHOLE HERD REPORTING WITH MATERNALPLUS®

Raising quality registered Angus cattle takes **COMMITMENT**.

As your genetic supplier, we are **DEDICATED** to not only improve today's genetics, but also prepare for the future of the Angus breed. We believe a commitment to improvement starts with the female.

Commit to the female — commit to MaternalPlus®.

Contact Customer Service at 816-383-5100 or angus@angus.org for more information.

ANGUS
THE BUSINESS BREED

Tokach Angus was one of the original participants of MaternalPlus

Don't buy an **imposter**.

Not all "Angus" bulls are **REGISTERED** Angus bulls.

If you see this logo in conjunction with an individual animal or group of animals, you know that that animal is registered with the American Angus Association and backed by the power of **data, programs** and **pedigrees** of the Association.

Invest wisely in those that carry the **Powered By Angus** logo.

Look for the **REGISTRATION NUMBER**.
For more information on the Powered By Angus program, visit:
Angus.org/PBA.
